

# How secure is your school against burglary and vandalism?

**[secur]**<sup>™</sup> burglary protection from Security Blinds is the only product that stops break-ins. Full stop!

- The only product to win the coveted Gold Award Status by Sold Secure, the UK's leading Security Standard's body (approved by ACPO – Association of Chief Police Officers).

That's why:

- we are the only real solution to the problem of school break-ins.
- more and more schools and universities are installing Secur<sup>™</sup> from Security Blinds.

“The college needed to secure its IT room and at the same time wanted to maintain a classroom environment, so we looked at Secur<sup>™</sup> as a solution. Secur<sup>™</sup> did both and the installation was quick and efficient”

Frank Bridgeman, Site Maintenance & Building Service Manager, Harris City Technology College

Burglary protection from Security Blinds

“It does not make students feel as if they are in a prison – unlike the approach we would have traditionally taken with security grilles.”

Bernadette Duncan, City University's Head of Security Services,  
Telecommunications and Safety Liaison Office

## **[secur]**™ Uniquely simple, safe, durable, versatile

With the aesthetic appeal of vertical blinds, Secur™ is easily adjustable to control sunlight and sound thus negating the need for ordinary blinds. They create a safe, natural environment that is both a break-in deterrent and 'pupil-proof'!

Steel rods are concealed within each blade incorporating a unique locking mechanism which allows the blind to operate in the same way as a conventional blind whilst maintaining the protection of a concealed steel grille. The blinds are mounted on the inside of the building and are secured in a steel framework which can be opened and closed for cleaning or access to windows in case of an emergency.

In addition to the increasing number of schools and universities specifying Secur™ it has also been installed in buildings owned by the five main high street banks, five different police forces, special branch, BT, Network Rail, museums, hospitals and local authorities.

City University (with its twenty thousand students) were looking for a solution to strengthen their security. They were expecting to install a combination of grilles, laminated glass and traditional blinds but instead they found a solution which fulfilled all of their needs in one product - Secur™.

Schools and colleges are increasingly vulnerable to break-ins due to the many thousands of pounds being spent on equipment. Secur™ is being requested throughout the education sector to protect these investments (PCs, laptops, projectors, whiteboards, sports equipment etc) as well as to secure examination papers (required by new legislation), confidential data, cash and access to ground floor student accommodation.
